

Care and maintenance for your Arena Honeycomb Shades

Regular Care:
Arena Honeycomb Shades are 100% anti-static polyester. Simply raising and lowering your shades naturally repels dust. Regular light dusting with a feather duster is all that is needed in most circumstances

Dusting:
Use compressed air or a hair dryer (non-heat setting). This will gently dust both surface area and inside the cells.

Vacuuming:
Vacuum gently with a brush attachment of any vacuum cleaner. Most fabrics may be vacuumed using a vertical stroke

Spot Cleaning
Spot clean translucent fabrics with a soft cloth or sponge moistened with lukewarm water. Add mild detergent if needed. Blot gently to avoid creasing or damaging the fabric. Rubbing can damage fabrics.

Cleaning:
Translucent fabrics may be ultrasonically cleaned or immersed in a bath. This is not suited to blackout fabrics

Drying:
After spot cleaning or immersion dry your shades in the fully lowered position.

Headrail:
Wipe your headrail with a damp cloth and mild detergent

Raise your shades:
Fully raising your shades for a short period of time helps maintain the crisp lines of the Honeycomb
